EKB's commercial lending team has a wide range of experience representing many different types of businesses in various industries. We make certain to understand the needs of our clients and their ventures to determine how they should best fund their transactions.

Borrowing and lending is an essential component of most businesses. Whether you're buying a business or commercial property, or you're working to obtain the necessary capital to grow a business, it's important to understand the objectives of the transaction to determine the right type of financing required.

We have assisted many commercial enterprises, large and small, advising them on the requirements and risks associated with commercial finance. We also represent lenders in various lending transactions and ensure that they have the right tools to protect their investment, including credit unions and private lenders. Our experience in providing advice concerning the lending side of transactions, as well as the borrowing side, has equipped us to understand both ends of the lending process.
